- *Quickly and easily removed with emergency release buttons.*
- *Different sizes that expand. Fit windows from 14 inches to 120 inches.*
- *3 7/8 inch spacing between bars prevents children from falling through.*
- *Installs easily and securely into window frame using 4 screws.*
- Steel construction withstands 150 pounds of pressure.
- 4 button safety release buttons may defeat curious children longer
- Meets the ASTM Standard F2090-08

KidCo Mesh Window Guard

- Mesh design blends with window treatments giving it a pleasing look
- Can be used on Single and Double Hung Windows
- May work on sliding windows that are no more than 30 inches high (**Window Guard would need to be opened to open windows**)
- Fits window sizes 26"-40" wide (height of opening can be no more than 30 inches high)
- Quick release hardware for emergency escape for adults and older children
- Meets F2090 -08 ASTM standards
- Available in White
- May be available in Local Stores

Disadvantages:

Only works on some windows

John Sterling Window Guards

- Manufactured with Durable Steel
- Can be used on Single or Double Hung Windows (Only)
- Guards swing open for emergency escape
- Sizes from 14" wide to 76" wide
- Guards can be recessed or surface mounted
- Child Safety Guards are easily opened by an adult or older child in case of an emergency
- Meets the ASTM Standard F2090-08

Disadvantages:

Does not work for Sliding or Casement Windows for Emergency Escape

Large Black Safety Release Pin may attract curious children

Does not come with removal instructions imprinted on product (Consider posting removal directions nearby for adults and older children)
